DIRECTORS RESPONSIBILITY & APPROVAL OF ANNUAL FINANCIAL STATEMENTS

The directors are required by the Companies Act, 2008, in South Africa to maintain adequate accounting records and are responsible for the content and integrity of the financial statements and related financial information included in this report. It is their responsibility to ensure that the financial statements fairly present the state of affairs of the company as at the end of the financial year and the results of its operations and cash flows for the period then ended, in conformity with the South African reporting standards applicable. The independent accountants are engaged to compile the financial statements based on the information and explanations presented.

The financial statements are prepared in accordance with South African reporting standards applicable and are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgments and estimates.

The directors acknowledge that they are responsible for the system of internal financial controls. These are designed to provide reasonable, but not absolute, assurance as to the reliability of the financial statements, to adequately safeguard, verify and maintain accountability of assets and to prevent misstatement and loss. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk.

The directors are of the opinion that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the financial statements.

The financial statements have been prepared on the going concern basis as the directors have every reason to believe that the company has adequate resources to continue in operation for the foreseeable future.

The annual financial statements for the year ended 28 February 2013 as set out on pages 3 – 11 have been approved by the board of directors and is signed hereunder on their behalf.

NOTES TO THE FINANCIAL STATEMENTS
28 FEBRUARY 2013

1. ACCOUNTING POLICIES

1.1 BASIS OF PREPARATION

Presentation of Financial Statements

The financial statements have been prepared in accordance with South African reporting standards and the Companies Act in South Africa. The financial statements have been prepared on the historical cost basis of accounting and incorporate the following principal accounting policies which are consistent with those applied in the previous years.

1.2 PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are stated at historical cost less accumulated depreciation.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits associated with the item will flow to the company; and
- the cost of the item can be measured reliably.

Cost of property, plant and equipment includes all directly attributable expenditure incurred in the acquisition, establishment and installation of such assets so as to bring them to a working condition for their intended use. Interest costs are not capitalised.

Depreciation is charged to income on a straight line basis so as to write off the cost of the assets over their expected useful lives.

The principal rates used are as follows :

Land and buildings	- 00%
Building appurtenances	- 10 to15%

1.3 FINANCIAL INSTRUMENTS

Financial instruments carried on the balance sheet includes cash and bank balances, trade and other receivables, trade and other payables, borrowings and investments.

Financial assets are recognised when the company has rights or other access to economic benefits. Such assets consist of cash or a contractual right to receive cash or another financial asset.

Financial assets, or a portion of a financial asset, are derecognised when, and only when, the entity loses control of the contractual rights that comprise the financial asset (or a portion of the financial asset). Such control is lost if the entity realises the right to benefits specified in the contract, the rights expire, or the entity surrenders those rights.

Financial liabilities are recognised when there is an obligation to transfer benefits and that obligation is a contractual liability to deliver cash or another financial asset or to exchange financial instruments with another entity on potentially unfavourable terms.

The recognition and measurement criteria for each of these financial instruments are separately disclosed under their respective accounting policies.

1.4 TRADE AND OTHER RECEIVABLES

Receivables originated by the Company by providing services directly to the tenants are carried at original invoice amount less provision for doubtful receivables.

A provision for doubtful receivables is established where there is objective evidence that the company has incurred a loss and will not be able to collect all amounts due according to the original terms of the receivables. The amount of the provision is the difference between the carrying amount and the recoverable amount. This provision is recognised either directly or through the use of an allowance account. The amount of the loss is included in the income statement for the period. Subsequent recoveries are credited to the income statement.

NOTES TO THE FINANCIAL STATEMENTS
28 FEBRUARY 2013

(Continued)

1. ACCOUNTING POLICIES (Continued

1.5 CASH AND CASH EQUIVALENTS

Cash and cash equivalents are carried in the balance sheet at its face value.

For the purposes of both the balance sheet and cash flow statement, cash and cash equivalents comprise cash on hand, and bank overdrafts, which form an integral part of the entity's cash management, all of which are available for use by the entity unless otherwise stated.

1.6 EQUITY INSTRUMENTS

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities.

The Entity's principal equity instrument is share capital and is recorded at the proceeds received.

1.7 NON CURRENT DEBT

Long term debt, are originally recognised at cost. Interest bearing debt is subsequently stated at cost less principal payments and interest amortisations. Amortisation of finance charges are recognised in the income statement over the period of the debt using the effective interest rate method.

1.8 TRADE AND OTHER PAYABLES

Trade and other payables are stated at cost.

1.9 TAXATION

Current taxation

The charge for current taxation is based on the results of the period and is adjusted for items that are non-assessable or disallowed. Current taxation is measured at the amount expected to be paid, using taxation rates and laws that have been enacted or substantively enacted by the balance sheet date.

1.10 REVENUE

Revenue comprises turnover and represents the recorded invoiced value of rentals and services supplied by the entity net of VAT.

The company measures revenue at the fair value of the consideration received or receivable.

Revenue is recognised only when it is probable that the economic benefits associated with a transaction will flow to the Company and the amount of the revenue, and associated costs incurred or to be incurred, can be measured reliably.

1. ACCOUNTING POLICIES (Continued)

1.11 FINANCIAL RISK MANAGEMENT

Financial risk factors

The Company purchases or issues financial instruments in order to finance its operations and to manage the interest rate risks that arise from its operations and sources of finance. Various financial assets and liabilities, for example trade receivables, trade payables, other payables and provisions, arise directly from the Company's operations. Changing market conditions expose the Company to various financial risks and have highlighted the importance of financial risk management as an element of control for the Company. Principal financial risks faced in the normal course of the Company's business are interest rate risk, credit risk and liquidity risk. These risks are managed within an approved management policy.

The Company finances its operations through a mixture of retained profits, bank borrowings and long-term loans. Long-term financing is arranged locally by the board of directors.

Interest rate risk

The company's income and operating cash flows are substantially independent of changes in market interest rates. It is the policy of the company to limit its exposure to interest rate movements and, where appropriate, enter into arrangements to mitigate these risks.

Credit risk

Financial assets, which potentially subject the company to concentrations of credit risk, consist principally of cash, short-term deposits and trade receivables.

The Company's cash and cash equivalents and short term deposits are placed with high credit quality financial institutions.

Trade receivables are presented net of an allowance for doubtful receivables. The company has policies in place to ensure that the provision of services are made to customers with an appropriate credit history. Trade receivables comprise a limited customer base.

Liquidity risk

The company is exposed to liquidity risk as a result of uncertain accounts receivable related cash flows and the capital commitments of the company.

Prudent liquidity risk management implies maintaining sufficient cash resources and ensuring the availability of funding through an adequate amount of credit facilities.

The company manages liquidity risk through forecasting and monitoring cash flows on a daily basis.

2. PROPERTY, PLANT AND EQUIPMENT

LAND AND BUILDINGS

Land consist of Erf 5121 situate in the town of Lenasia, Reg. Division I.Q. Gauteng (Transvaal) acquired in 1995 at a cost of Additions and capitalised costs - 1995 to 2000
